		<p>This is a Sales order out of QuickBooks. When we get an order from our customer, we enter the order on to this form in Quickbooks. I would like for our order form on the website to look similar to this. Also, the section under PO number - this is the customers ordering number. Would it be possible for the order to be stopped or the order not processed unless this field is filled out?</p> <p>Also, our shipping policy is pre-paid freight on an order \$3,000 or greater. Freight is also pre-paid on any syringe order \$1,000 or greater. Other wise the order will be FOB Kenansville, NC.</p> <p>Please leave off the rep field & the project name field, this is for internal use only. Once an order has been received, we will enter it into our system and email an order confirmation back to the customer.</p> <p>Please order in full cases. Out-of-state sale, exempt from sales tax</p>			0.00%	0.00

Thanks for your business!	Total	\$0.00
