### *For Immediate Release*

#### *New & Improved Marking Ink Formula*

Kenansville, NC – As a result of customer suggestions, Prima Tech USA has completely re-formulated the marking ink it uses in its innovative VAC-MARC™ injection system. The VAC-MARC™ is a medicine injection system that places a visible ink mark on the food animal simultaneous to the injection of medicine.

With the re-formulation, the Prima MARC™ Spray will now mark upwards of 300 animals from a single can without a clog or misfire which results in a cost of less than \$0.01 per mark. The new formula allows the mark to remain on the animal for up to 7 days, preventing inadvertent re-injection and allowing spot checks of vaccination crews. The discernable mark is located within an inch to inch-and-a-half of the actual injection site.

For more information contact Prima Tech USA (888) 833-7099 or your nearest animal medical supply distributor.

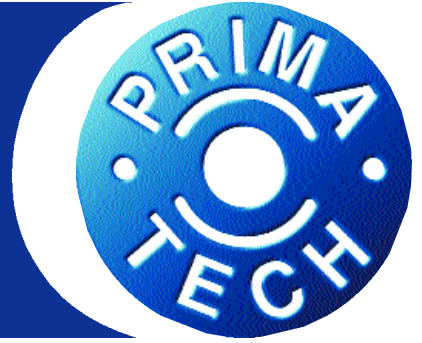

Photo Caption: Prima Tech USA's new Prima VAC-MARC™ Spray formula provides no mess, no clogs and no hassle for upwards of 300 marks per can. The mark is placed on the animal within an inch of the injection site, by the patented VAC-MARC™ Injection System.
